

The Ultimate DIY Guide to Just About Everything

1. **Prepare the room.** Remove all furniture and curtains from the room. Cover the floor with a drop cloth.
 2. **Clean the walls.** Use a damp sponge or cloth to wipe down the walls and remove any dirt or dust.
 3. **Apply primer.** Primer helps to create a smooth surface for the paint to adhere to. Apply a coat of primer to the walls, using a paint roller or brush.
 4. **Paint the walls.** Once the primer has dried, it's time to paint the walls. Use a paint roller or brush to apply two coats of paint, allowing each coat to dry completely before applying the next.
 5. **Clean up.** Once the paint has dried, remove the drop cloth and replace the furniture and curtains.
-
1. **Remove the old flooring.** If you're installing new flooring over existing flooring, you'll need to remove the old flooring first. This can be done using a pry bar or a flooring removal tool.
 2. **Prepare the subfloor.** Once the old flooring has been removed, you need to prepare the subfloor for the new flooring. This may involve leveling the subfloor or repairing any damaged areas.
 3. **Install the new flooring.** The type of flooring you choose will determine the installation process. However, most flooring types are installed using a combination of glue, nails, and screws.

4. **Finish the floor.** Once the flooring has been installed, you need to finish it by applying a sealant or stain. This will help to protect the flooring from wear and tear.
1. **Plan your remodel.** Before you start, it's important to plan your remodel carefully. This includes choosing the new fixtures and finishes you want, as well as determining the layout of the bathroom.
2. **Demolish the old bathroom.** Once you have a plan, it's time to demolish the old bathroom. This involves removing all of the fixtures, finishes, and walls.
3. **Install the new fixtures and finishes.** Once the old bathroom has been demolished, it's time to install the new fixtures and finishes. This includes the vanity, toilet, shower, and bathtub.
4. **Finish the bathroom.** Once the new fixtures and finishes have been installed, it's time to finish the bathroom. This includes painting the walls, installing the flooring, and adding the finishing touches.
1. **Plan your deck.** Before you start, it's important to plan your deck carefully. This includes choosing the location, size, and shape of the deck, as well as the materials you want to use.
2. **Build the deck frame.** The deck frame is the foundation of the deck. It's made of pressure-treated lumber and is attached to the house using joist hangers.
3. **Install the deck boards.** The deck boards are the surface of the deck. They're made of pressure-treated lumber or composite materials.
4. **Finish the deck.** Once the deck boards have been installed, it's time to finish the deck. This includes adding railings, stairs, and other

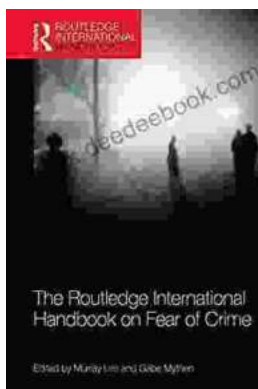

finishing touches.
